1. The substitute specification filed July 19, 2001 has not been entered because it does not conform to 37 CFR 1.125(b) and (c) because: there is a brief description of a figure that is not presented (figure 6), table 1 is deleted and the producer information is added for the trademarked materials.

2. The use of the trademark Ultem, Ultem 2300 and Teflon has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

3. Claims 7 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims contain the trademarks Ultem, Ultem 2300 and Teflon which refer to the producer rather than the material. Thus it is not clear if applicant wishes to be limited to the products from the specific producers referred to by the trademarks or if the generic materials were intended. If the generic materials were intended, then the generic names should be used in the claims.

4. Claims 1-6,8-14,16-24 are allowed. The art of record fails to teach or fairly suggest the reaction processing vessel structure.

5. Claims 7 and 15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art is directed toward microwave digestion vessels and online microwave digestion structures.
